

URAI-JOBS

Institutional Governance & Continuity Pack

Version: v1.0.0-INSTITUTIONAL

This document formalizes governance, continuity, security, and survivability structures for URAI-JOBS.

Board Governance Charter

- Defines governance authority over security, release integrity, AI oversight, and risk management.
- Establishes quorum requirements and amendment procedures.
- Separates operational authority from institutional oversight.

Root Key Custody & Shard Protocol

- Root key generated on air-gapped device.
- 2-of-3 Shamir shard model for recovery.
- Separate physical custody locations.
- Governance quorum required for reconstruction.

Catastrophic Recovery Runbook (72-Hour Survival)

- Cloud region failure recovery process.
- Key compromise response protocol.
- Data breach containment and notification procedure.
- Mandatory integrity verification before restoration.

Operational Compliance Checklists

- Quarterly access review completion.
- Signed release manifest validation.
- Key rotation log verification.
- Audit log hash-chain validation.
- Incident simulation drill completion.

Founder Continuity & Governance Lock Model

- Governance authority survives founder absence.
- Equity transfer does not override institutional controls.
- Release authority separated from ownership.
- Emergency freeze requires quorum approval.

Hostile Acquisition Stress-Test Framework

- Acquirer cannot bypass release signing requirement.
- Tenant isolation non-negotiable under charter.
- Root key custody not transferable without quorum.
- Governance override logged and archived.

5-Year Durability Roadmap

- SOC2 Type I achievement.
- SOC2 Type II monitoring.
- Multi-region portability readiness.
- Annual governance review cycle.
- Infrastructure survivability simulation.

Notarization & Institutional Lock Statement

This document is intended for formal signature and optional third-party notarization. Upon signing, the governance framework herein becomes binding under internal corporate policy.
